### Your Result

You will gain insight into what is needed during cultivation and which agents you can and are allowed to use. And most importantly, how to use them.

Did you know that we also offer this course in a classroom setting?

[Execution of Crop Protection English \(License 1\)](#)

### Approach

During the chapters, we cover various aspects that are important to properly read, mix, and use the agents. The course material can be found in the book we send to you. Once you have completed the self-study, it's time to take the exam. An important part of this study is the recognition of diseases and pests.

If you achieve a sufficient result, you will receive a spray card from Bureau Erkenningen with a validity of 5 years. After obtaining your license, the next step is to attend a total of 4 extension meetings within 5 years. This way, you can maintain your spray license, which will then be extended for another 5 years. In this manner, you stay informed about the latest developments.

### Content

- reading the label
- use of reference materials
- recognition of weeds
- recognition of diseases and pests
- control methods
- non-chemical crop protection
- chemical crop protection

- safety and health
- laws and regulations

The exam covers the above topics (multiple-choice questions).

### Prerequisites

No specific prior knowledge is required for this course.

### Costs

€320, excluding 21% VAT.

The cost of a resit exam is €95, excluding 21% VAT.

### Course Duration

The self-study is flexible. We recommend taking at least one month of learning time. The average study time is between 20-25 hours.
